TESTS, TITLES & TIMING:

How Does a Fast CAT Work?

1. Fast CAT is a timed straight race of 100 yards.
2. Dogs run singularly.
3. The dog's time to complete the 100 yd dash is converted into mph
4. A handicap system is applied to a dog's MPH to determine the number of points earned. The handicap system is based on the height of the dog at its withers:
 - a. 18" or greater - handicap is 1.0
 - b. 12" up to less than 18" - handicap is 1.5
 - c. Below 12" - handicap is 2.0
 - d. Points = MPH multiplied by the dog's handicap
 - e. Fast CAT suffix titles are earned at designated milestones:
 - f. BCAT = 150 points
 - g. DCAT = 500 points
 - h. FCAT = 1,000 points
 - i. FCAT# = every additional 500 points
5. Timing Devices: The time to complete the 100-yard dash is recorded to the nearest 1/100th of a second (e.g., 9.11). The club may use stopwatches or break-the-beam equipment to obtain the time. If stopwatches are used, there shall be two timers positioned at the finish line. An individual at the start line shall signal with an arm drop the moment the nose of the dog crosses the start line. The timers shall start their stopwatches at the bottom of the arm drop. The timers shall stop their watches when the nose of the dog crosses the finish line. The times from the two stopwatches shall be averaged to determine the recorded time.

Area of the course will be fenced with a fenced-in recovery area of 30 yards or larger. To learn more about AKC's Fast CAT please visit AKC Fast CAT webpage <http://images.akc.org/pdf/FastCATRegs04.2016.pdf>
